## Louver Hardware System

**The pros love FLEX·fence®**

**“THE YARD CRIED OUT, I NEED AN UPDATE”** - “Unlike lattice toppings, louvers give you a variety of looks and the panels can be opened for air flow or sunshine, or closed for privacy” **Canadian Living Magazine June 1998**

**LET THE SUN IN - OR KEEP IT OUT** - “The FLEX·fence® hardware system offers a great alternative to conventional fences and deck railings...”  
**Canadian Living Magazine October 1997**

“Imagine a fence with adjustable louvers that you can open and close at will. Sound impossibly extravagant? Then take a look at FLEX·fence®...”  
**Century Home April 1995**

“...an open-slat fence doesn't provide privacy and a solid fence doesn't let in the breeze. FLEX·fence® lets you have it both ways...”  
**Delaware County Sunday Times Cover Story June 1994**

**Our customers love FLEX·fence® too!!**

“The kits of FLEX·fence® were builder friendly and the instructions were clear... We are very pleased with the results of our FLEX·fence® project... It definitely provided a cooler environment for the solarium inside the house... We wish you continued success with... an innovative and excellent product... - FLEX·fence®”  
**MJD, Ottawa September 1998**
